## **Transcranial Magnetic Stimulation for Depression: Another Tool in Our Toolbox**

- Why do we need more tools?
- Current Tools
- History and Development of TMS
- Efficacy and Side Effects
- Patient Experiences
- Fees and Referrals
- Future of TMS
- Questions?

### **About the Presenter:**

Dr. Jennifer Hamilton, MD, earned her medical degree from the University of Vermont and completed her psychiatry residency at Stanford University. In 2018 she became interested in bringing dTMS to the mid-Willamette Valley as another resource to improve patients' lives. She began offering dTMS in 2019 with a state of the art BrainsWay machine. In addition to dTMS, Dr. Hamilton continues to provide psychopharmacology, psychotherapy and GeneSight testing in her private practice in Corvallis. She also works one day a week at the Oregon State Hospital in Junction City.
